Zał. nr 2 do ZW 64/2012

Attachment no. …. to Programme of Education

PROGRAMME OF STUDIES

1. Description

Number of semesters:	*Number ECTS points necessary to obtain qualifications: 210*
Prerequisites (particularly for second-level studies): *The competition of grades from maturity certificate and certificate of secondary school.* *In case of foreign students, secondary school certificate, received after the completion of a recognized secondary school (total 12 years of education), being the equivalent of Polish maturity certificate accepted by Kuratorium Oświaty.*	*Upon completion of studies graduate obtains* *professional degree of: engineer (inż)* *1st/~~2nd~~* level qualifications*
Possibility of continuing studies: *the possibility to continue study at the second level*	*Graduate profile, employability:* *First level studies (undergraduate - engineer degree) are not divided into specializations. It gives students opportunity to get basic knowledge in the area of informatics including programming, algorithms and data structures, programming languages and techniques, computer architecture, computer networks, databases and data warehouses, embedded systems including mobile systems, distributed and web-based systems, multimedia, intelligent systems and IT project management - needed for design, development and exploitation of modern IT solutions among others for the Internet and e-economy. Studies shows a variety of computer applications in*

	technical, economic and biomedical systems. They learn methods of data collection and processing, basic of decision-making, methods of artificial intelligence and expert systems. IT knowledge is complemented by knowledge of physics and mathematics, management science and social communication. The graduate has the ability to efficiently use modern tools of information technology and has wide social skills such as ability to cooperate and work in a team, understands the needs and knows the capabilities of continuous education, understands the ethical, economic and law conditions of computer engineer activity. He knows English language at the B2 level. In the case of foreign students studying in English language, they know Polish language at a basic level. *Obtained knowledge and abilities gives opportunity to continue education at the second level by choosing one of 12 specialisation offered by Faculty of Computer Science and Management: security of information systems, informatics technologies of knowledge management, intelligent information systems, Internet and mobile technologies, software engineering, information systems, database systems, decision support systems, teleinformatics, intelligent information systems, computer engineering, information technologies. It is a general Faculty offer. In each admission process different specializations may be open, which one will be open depends on students preference. Moreover some of the specializations and the first level of study in each academic year*

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

	are given in English also. *Gained during first level of study skills can be grouped into five groups of skills:* *• use modern information technology tools and systems* *• design and create software solutions in IT and non-IT systems for various applications and made in different technologies* *• implementation and deploying efficient, reliable, safe and satisfying user requirements IT solutions* *• evaluation, improvement, proposing and developing solutions that include computer system,* *• management, administration, installation, deploying, and testing of IT tools and systems* *A graduate can be employed in companies that produce software or in companies, which designs, deploys and administers computer networks or computer systems for different applications in economic or social sectors of public and private organizations:* *• Application / system programmer* *• Network administrator* *• Linux / Windows systems administrator*

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

	• Computer engineer / IT specialist / serviceman / tester *• Webdesigner/Webdeveloper/Webmaster* *A graduate can works as an employee or manager as well as can be IT company owner.*
Indicate connection with University's mission and its development strategy:	*Informatics field of study is carried out at the Faculty of Computer Science and Management, which is one of the largest of 12 faculties of Wrocław University of Technology. Teaching program at Informatics field of study at the first level of study represents differentiated substantially canon of knowledge, skills and competencies necessary for modern informatics engineer. It is consistent with the mission of the University and its development strategy, which requires from graduates certain the skills with an emphasis on social skills and competences to allow actively formulate and build the private future and prosperity as well as at the University, and the region. Offered curriculum meets the requirements of the National Education Framework and builds graduate skills, based on current and future information technology methods and tools, which vary significantly in education cycle. Substantive differentiation of program is justified by dynamically changing market needs, and by academics having the highest qualifications in the discipline of informatics. Development of Informatics field of study is realized by participating of Institute of Informatics in different international research and educational programs, for example: ERASMUS, COST, etc. Academics and*

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)

[7] Optional – enter W, obligatory – enter Ob

	students take part in these programs carrying out research as well as diploma theses. Teaching at a high level based on the modern and constantly modernized laboratories in which students can develop their practical skills. The Institute has the necessary computing equipment, laboratories and software for the first level students, moreover ZPI and diploma students have access to integrated virtualized computing platform. According to the mission of the University for needs in terms of relations with region and its economy, the Institute has strong relations with local as well foreign IT companies. Cooperation with companies includes the following forms: ordering projects by IT companies, ordering projects by IT companies, ordering reviews for innovation, special lectures for students conducted by experts from companies, realization by students diploma thesis on topics in which company is interested in, realization during Team Project course projects in which company is interested in, practical training for students, sponsoring of student competitions organized by the Institute of Informatics, joint seminars of business professionals and employees of the Faculty of Computer Science and Management organized by the IT Companies Forum, hardware and software support by IT companies for academic initiatives. The most important companies which cooperates with the Institute of Informatics are as follows: Capgemini, IBM, Microsoft Corp., Nokia Siemens Networks, Volvo, InsERT. The Institute of Informatics is one of the first academic institution, which have a laboratory for students with specialized

	professional training, organized by the IBM Academic Initiative, Microsoft IT Academy, Cisco Academy, Advanced Digital Broadcasting. What's more these activities are included into teaching process.

2. Fields of science and scientific disciplines to which educational effects apply:

Informatics direction is general academic profile that belongs to education area of technical sciences

3. Concise analysis of consistency between assumed educational effects and labour market needs

Correspond to the needs of:

a) institutions and companies engaged in an activity of manufacturing, trade, services and research for IT professionals involved in the maintenance / development of IT tools to support this activity at the operational and strategic (planning, management) levels,
b) manufacturers of IT systems for various purposes (designers, programmers, testers, administrators),
c) companies designing, deploying and maintaining computer systems and networks in different departments of enterprises and social organizations, both public and private.

5	INZ0295Q	Practical Training								150	5							
		Total	0	0	0	12	2		210	780	26	12,6						

Altogether for main-field-of-study modules:

Total number of hours					Total number of ZZU hours	Total number of CNPS hours	Total number of ECTS points	Number of ECTS points for BK classes[1]
lec	cl	lab	pr	sem				
12	2	9	14	3	600	1770	59	32,4

4.2.4 List of specialization modules

4.2.4.1 *Specialization subjects (e.g. whole specialization)* modules *(min. .... ECTS points):*

No..	Course/group of courses code	Name of course/group of courses (denote group of courses with symbol **GK**)	Weekly number of hours					Field-of-study educational effect symbol	Number of hours		Number of ECTS points		Form[2] of course/group of courses	Way[3] of crediting	Course/group of courses			
			lec	cl	lab	pr	sem		ZZU	CNPS	total	BK classes[1]			university-wide[4]	practical[5]	kind[6]	type[7]
		Total																

4.2.4.2 ……*(e.g. diploma profile)* module *(min. .... ECTS points):*

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

Altogether for specialization modules:

Total number of hours					Total number of ZZU hours	Total number of CNPS hours	Total number of ECTS points	Number of ECTS points for BK classes[1]
lec	cl	lab	pr	sem				

4.3 Training module (Faculty Council resolution on principles of crediting training – attachment no. …)

Name of training			
Number of ECTS points	**Number of ECTS points for BK classes[1]**	**Training crediting mode**	**Code**
5	**0**	**Z**	INZ0295Q

Training duration	**Training objective**
4 weeks	*Familiarization with the professional IT solutions, their designing, programming, deploying and administration of IT companies. Then formulation and implementation of simple engineering tasks to check the previously acquired skills and competences, especially including the teamwork.*

4.4 Diploma dissertation module

Type of diploma dissertation	Licencjat / inżynier / magister / magister inżynier	
Number of diploma dissertation semesters	**Number of ECTS points**	**Code**
1	**12**	INZ0286p
Character of diploma dissertation		
Project, computer program		

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

Number of BK[1] ECTS points	**7,2**

5. Ways of verifying assumed educational effects

Type of classes	**Ways of verifying assumed educational effects**
lecture	e.g. examination, progress/final test
class	e.g. progress/final test
laboratory	e.g. pretest, report from laboratory
project	e.g. project defence
seminar	e.g. participation in discussion, topic presentation, essay
training	e.g. report from training
diploma dissertation	prepared diploma dissertation

6. Total number of ECTS points, which student has to obtain from classes requiring direct academic teacher-student contact (enter total of ECTS points for courses/groups of courses denoted with code BK[1])

…123,2…. ECTS

7. Total number of ECTS points, which student has to obtain from basic sciences classes

Number of ECTS points for obligatory subjects …….	27	
Number of ECTS points for optional subjects ….	0	
Total number of ECTS points	27	

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

8. Total number of ECTS points, which student has to obtain from practical classes, including laboratory classes (enter total number of ECTS points for courses/group of courses denoted with code P)

Number of ECTS points for obligatory subjects …….	41	
Number of ECTS points for optional subjects ….	36	
Total number of ECTS points	77	

9. Minimum number of ECTS points, which student has to obtain doing education modules offered as part of university-wide classes or other main field of study (enter number of ECTS points for courses/groups of courses denoted with code OG)

…25…. ECTS points

10. Total number of ECTS points, which student may obtain doing optional modules (min. 30% of total number of ECTS points)

…69…. ECTS points

11. Range of diploma dissertation

1. Basic operations on sets, functions and relations. Sentential calculus. Calculus of Predicates.
2. Graphs (basic concepts, spanning tree, Euler and Hamilton cycles, consistency).
3. The concept of the algorithm.
4. Fundamentals of algorithm analysis. Computational complexity.
5. An examples of algorithms. Sorting algorithms, selection, search.
6. Elements of a programming language: variables, data types, expressions, statements and control structures.
7. Object-oriented programming (classes and objects). Inheritance and polymorphism.
8. Basic elements of digital structures.
9. Von Neumann computer architecture.
10. Microcomputers - organization and architecture.
11. Parallel computers architecture.

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

12. Embedded systems architecture. Designing of embedded systems. MHP design environment.
13. Information systems models (general- and specific-purposes systems).
14. Local and wide area networks – topological structures.
15. Reference models of computer networks (Open System Interconnection/International Standard Organization and Transport Control Protocol/Internet Protocol models).
16. Protocols of computer networks.
17. Data link layer protocols. Ethernet. TCP/IP protocols stack.
18. Client-server model. Http protocol.
19. Transmission channels and their organization for information transmission purposes.
20. Websites and web application programming language.
21. Distributed systems.
22. Communication in distributed systems.
23. Algorithms for data exchange. Mechanisms of the implementation of distributed services.
24. Inter process communication (IPC).
25. Software development methodology.
26. Structural and object-oriented software design.
27. Models of software life cycle.
28. UML as a language of design specifications.
29. Design patterns.
30. Project Management - the structure of work, planning, scheduling, monitoring and quality.
31. Artificial intelligence - basic concepts, area of studies, areas of application.
32. Database models. A relational database. Normalization. Transactions.
33. Basics of SQL.
34. Basics of database and data warehouses design.
35. Mechanisms of knowledge processing in expert systems
36. Operating system.
37. The layered structure of the operating system.The concept of the system kernel.
38. Computer and Network Security.
39. Security models. Information flow model. Security of IP and IP v6 protocol.

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
[3]Exam – enter E, crediting – enter Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)
[4]University-wide course /group of courses – enter O
[5]Practical course / group of courses – enter P. For the group of courses – in brackets enter the number of ECTS points assigned to practical courses
[6] KO – general education, PD – basic sciences, K – field-of-studies, S – specialization
[7] Optional – enter W, obligatory – enter Ob

40. Structure and properties of control systems. Typical control algorithms. Construction and structure of a typical computer control systems.
41. Static object identification algorithms. Analytical and numerical methods of optimization.

12. Requirements concerning deadlines for crediting courses/groups of courses for all courses in particular modules

No.	*Course code*	*Name of course*	*Crediting by deadline of... (number of semester)*
1	FZP1052C	General Physics	3
2	FZP1052W	General Physics	3
3	MAP1070C	Elementary Linear Algebra	3
4	MAP1070W	Elementary Linear Algebra	3
5	MAP1043C	Mathematical Analysis I	3
6	MAP1043W	Mathematical Analysis I	3
7	INZ0250Wl	Introduction to Programming (GK)	3
8	INZ0251Wc	Introduction to Computer Systems (GK)	3
9	FZP2079L	General Physics	4
10	MAP2005C	Mathematical Analysis II	4
11	MAP2005W	Mathematical Analysis II	4
12	INZ0252Wc	Electronics and Metrology – basic principles (GK)	4
13	INZ0253Wl	Computer Architecture and Organization (GK)	4
14	INZ0254Wcl	Data Structures and Algorithms (GK)	4
15	INZ0255C	Theory of Information and Signals	5

[1]BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students
[2]Traditional – enter T, remote – enter Z
